

# Flora Tomlinson-Pilley

## Wildlife and underwater Photographer and Filmmaker

I'm a passionate, award-winning, self-shooting producer, filmmaker, and wildlife photographer dedicated to telling powerful conservation stories. I specialise in working with scientists, NGOs, and charities to communicate the urgency and impact of their work through compelling visual storytelling. With a strong focus on marine and wildlife conservation, I aim to create films and imagery that inspire action, raise awareness, and build meaningful connections between people and the natural world.

market, plastic-free Falmouth, Fathoms free.

2025

Self-shooting producer • Collaborative film 'The Bone  
Sharks' • St Helena National Trust, Over the swell,  
Woods Hole Oceanographic Institute

I have worked with esteemed organisations such as the Saint Helena National Trust, RSPB, and The Rock Pool Project, where my photography and filmmaking have been widely used to support conservation initiatives and engage diverse audiences. My work has made a tangible difference, from documenting biodiversity on the remote island of Saint Helena to promoting marine conservation efforts in collaboration with The Rock Pool Project. My ability to blend scientific understanding with creative storytelling has allowed me to contribute meaningfully to environmental education and advocacy. Through my efforts, I have created widely utilised content that supports the missions of various organisations and inspires action for the natural world.

## Education
